

Solution 1

— LFG Basics —

1 C-structure vs. F-structure

1. LFG has two core syntactic levels of analysis: the c-structure and the f-structure. What do each of these represent/encode? (6 points)
 - **C-Structure:** Linear precedence, constituency, hierarchical dominance relations.
 - F-structure:** abstract functional relations, predicate-argument structure (grammatical relations/functions), modification.
2. Analyze the sentences in (1). Draw c-structure trees and f-structure representations for each of the sentences.
 - (1) a. The children bought a book. (16 points)
 - b. Kim played. (16 points)
 - c. The children will buy a book. (16 points)

C-structure (1)

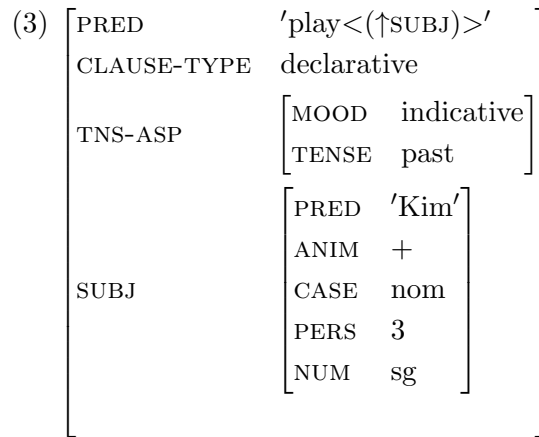

F-structure (1)

(2)	[PRED	'buy<(\uparrow SUBJ) (\uparrow OBJ)>'
		CLAUSE-TYPE	declarative
		TNS-ASP	[
			[MOOD indicative]
			[TENSE past]
]
		SUBJ	[
			[PRED 'child']
			ANIM +
			CASE nom
			PERS 3
			NUM pl
			DEF +
]
		OBJ	[
			[PRED 'book']
			GEND masc
			CASE acc
			PERS 3
			NUM sg
			DEF -
]
]

C-structure (2)

F-structure (2)

C-structure (3)

2.1 German

- SUBJ: agrees with the verb
Nominative
- OBJ: becomes SUBJ under Passivization
Accusative
- OBJ_θ further objects
Dative or Accusative
- OBL_θ PP Argument of the verb

(11) *der Magier* SUBJ (Nominative, subject-verb agreement), *den Kindern* OBJ_θ (Dative), *einen Zauberstab* OBJ (Accusative, becomes SUBJ under passivization)

(12) *der Magier* SUBJ (Nominative, subject-verb agreement), *den Lehrling* OBJ (Accusative, becomes SUBJ under passivization), *von seinem Vorhaben* OBL_θ (PP argument of verb)

(13) *der Magier* SUBJ (Nominative, subject-verb agreement), *die Kinder* OBJ_θ (Accusative, does not become subject under passivization), *das Fürchten* OBJ (Accusative, becomes SUBJ under passivization)

2.2 English

- SUBJ: subject-verb agreement
Nominative
- OBJ: becomes SUBJ under passivization
immediately postverbal
- OBJ_θ further NP arguments in the VP
- OBL_θ PP argument of verb

(11) *the magician* SUBJ (Nominative, subject-verb agreement), *the children* OBJ (immediately postverbal, becomes SUBJ under passivization), *a magic wand* OBJ_θ (further NP argument in the VP)

(12) *the magician* SUBJ (Nominative, subject-verb agreement), *the apprentice* OBJ (immediately postverbal, becomes SUBJ under passivization), *to magical habits* OBL_θ (PP argument of verb)

(13) *the magician* SUBJ (Nominative, subject-verb agreement), *the apprentice* OBJ (immediately postverbal, becomes SUBJ under passivization), *some money* OBJ_θ (further NP argument in the VP)

3 Lexical Rules

(5 points for the lexical rule, 8 points for further information on argument alternations)

3.1 German

- (8) a. Die Menschen glaubten dem Kanzler.
 b. Dem Kanzler wurde von den Menschen geglaubt.

The lexical rule covering examples as in (8) is given in (9). The subject becomes an oblique, but only in the context of a passive (ensured by the constraining equation) and only if there is no direct object in the clause (to make sure it does not apply to normal agentive transitive verbs).

- (9) SUBJ \longrightarrow OBL_{ag}
 $\neg(\uparrow\text{OBJ})$
 $(\uparrow\text{PASSIVE}) =_c +$

Other forms of passivization in German include:

- A stative passive (*Zustandspassiv*): *Der Brief ist geschrieben.*
- *Kriegen*-Passive: *Hans kriegte den Brief von Peter geschrieben.*
- *Bekommen*-Passive: *Hans bekam den Brief von Peter geschrieben.*

3.2 English

- (10) a. The child sprayed the wall with paint.
 b. The child sprayed paint onto the wall.

The lexical rule covering examples as in (10) is given in (11). The direct object becomes an oblique and the former oblique becomes the direct object. This can only happen with locative/spatial verbs.

- (11) OBJ \longrightarrow OBJ $_{\theta}$
 OBL $_{\theta}$ \longrightarrow OBJ
 (\uparrow VTYP) =_c loc

Other kinds of verbs work that work like *spray* in (11) are *load*, *fill*, *paint*.

Verbs like *swarm* can also participate in an argument alternation, as shown in (12). In this case the subject is realized as an oblique and the former oblique is realized as the subject.

- (12) a. Bees swarmed in the garden.
 b. The garden swarmed with bees.

4 C-Structure Configurations (15 points)

Analyse the sentences in (13a) and (13e) by providing a c-structure tree and a corresponding f-structure.

- (13) a. billi=ne kutte=ko b^hagaya
 Katze=Erg Hund=Acc jagte
 ‘Die Katze verjagte den Hund.’
 b. billi=ne b^hagaya kutte=ko
 c. b^hagaya billi=ne kutte=ko
 d. b^hagaya kutte=ko billi=ne
 e. kutte=ko b^hagaya billi=ne
 f. kutte=ko billi=ne b^hagaya

The permutations in (13) do not provide any evidence for a VP-constituent. It therefore would seem to make sense to assume the exocentric categorie S for Urdu.

C-structure (13a)

C-structure (13e)

F-structure

The f-structures for both of the sentences are the same (indeed, it is the same for all of the sentences in (13)). There is a difference in surface linear order, but not in terms of the underlying predicate-argument structure of the sentences.

(14)	<table style="border-collapse: collapse; width: 100%;"> <tr> <td style="padding: 2px 10px;">PRED</td> <td style="padding: 2px 10px;">'b^hag<(↑SUBJ) (↑OBJ)>'</td> </tr> <tr> <td style="padding: 2px 10px;">CLAUSE-TYPE</td> <td style="padding: 2px 10px;">declarative</td> </tr> <tr> <td style="padding: 2px 10px;">TNS-ASP</td> <td style="padding: 2px 10px;"> <table style="border-collapse: collapse; border-left: 1px solid black; border-right: 1px solid black;"> <tr> <td style="padding: 2px 10px;">MOOD</td> <td style="padding: 2px 10px;">indicative</td> </tr> <tr> <td style="padding: 2px 10px;">TENSE</td> <td style="padding: 2px 10px;">past</td> </tr> </table> </td> </tr> <tr> <td style="padding: 2px 10px;">SUBJ</td> <td style="padding: 2px 10px;"> <table style="border-collapse: collapse; border-left: 1px solid black; border-right: 1px solid black;"> <tr> <td style="padding: 2px 10px;">PRED</td> <td style="padding: 2px 10px;">'cat'</td> </tr> <tr> <td style="padding: 2px 10px;">CASE</td> <td style="padding: 2px 10px;">erg</td> </tr> <tr> <td style="padding: 2px 10px;">GEN</td> <td style="padding: 2px 10px;">fem</td> </tr> <tr> <td style="padding: 2px 10px;">PERS</td> <td style="padding: 2px 10px;">3</td> </tr> <tr> <td style="padding: 2px 10px;">NUM</td> <td style="padding: 2px 10px;">sg</td> </tr> </table> </td> </tr> <tr> <td style="padding: 2px 10px;">OBJ</td> <td style="padding: 2px 10px;"> <table style="border-collapse: collapse; border-left: 1px solid black; border-right: 1px solid black;"> <tr> <td style="padding: 2px 10px;">PRED</td> <td style="padding: 2px 10px;">'dog'</td> </tr> <tr> <td style="padding: 2px 10px;">GEN</td> <td style="padding: 2px 10px;">masc</td> </tr> <tr> <td style="padding: 2px 10px;">CASE</td> <td style="padding: 2px 10px;">acc</td> </tr> <tr> <td style="padding: 2px 10px;">PERS</td> <td style="padding: 2px 10px;">3</td> </tr> <tr> <td style="padding: 2px 10px;">NUM</td> <td style="padding: 2px 10px;">sg</td> </tr> </table> </td> </tr> </table>	PRED	'b ^h ag<(↑SUBJ) (↑OBJ)>'	CLAUSE-TYPE	declarative	TNS-ASP	<table style="border-collapse: collapse; border-left: 1px solid black; border-right: 1px solid black;"> <tr> <td style="padding: 2px 10px;">MOOD</td> <td style="padding: 2px 10px;">indicative</td> </tr> <tr> <td style="padding: 2px 10px;">TENSE</td> <td style="padding: 2px 10px;">past</td> </tr> </table>	MOOD	indicative	TENSE	past	SUBJ	<table style="border-collapse: collapse; border-left: 1px solid black; border-right: 1px solid black;"> <tr> <td style="padding: 2px 10px;">PRED</td> <td style="padding: 2px 10px;">'cat'</td> </tr> <tr> <td style="padding: 2px 10px;">CASE</td> <td style="padding: 2px 10px;">erg</td> </tr> <tr> <td style="padding: 2px 10px;">GEN</td> <td style="padding: 2px 10px;">fem</td> </tr> <tr> <td style="padding: 2px 10px;">PERS</td> <td style="padding: 2px 10px;">3</td> </tr> <tr> <td style="padding: 2px 10px;">NUM</td> <td style="padding: 2px 10px;">sg</td> </tr> </table>	PRED	'cat'	CASE	erg	GEN	fem	PERS	3	NUM	sg	OBJ	<table style="border-collapse: collapse; border-left: 1px solid black; border-right: 1px solid black;"> <tr> <td style="padding: 2px 10px;">PRED</td> <td style="padding: 2px 10px;">'dog'</td> </tr> <tr> <td style="padding: 2px 10px;">GEN</td> <td style="padding: 2px 10px;">masc</td> </tr> <tr> <td style="padding: 2px 10px;">CASE</td> <td style="padding: 2px 10px;">acc</td> </tr> <tr> <td style="padding: 2px 10px;">PERS</td> <td style="padding: 2px 10px;">3</td> </tr> <tr> <td style="padding: 2px 10px;">NUM</td> <td style="padding: 2px 10px;">sg</td> </tr> </table>	PRED	'dog'	GEN	masc	CASE	acc	PERS	3	NUM	sg
